

# Zhen Zhou

Tel: +86 15623301327

Email: [zhouzhen20210601@163.com](mailto:zhouzhen20210601@163.com)

Address: Liyang County, Changzhou City, Jiangsu Province

## EDUCATION

### Wuhan University of Technology (WHUT)

Wuhan, Hubei

Bachelor of Science in Information & Computing Science

09/2017-06/2021

Core courses: Comprehensive Experiment of Computer Foundation and C Programming, Mathematical Analysis, Mathematical Modeling, Ordinary Differential Equations, Data Structure & Algorithms, Design of Modeling and Numeric Simulation, Probability and Mathematics Statistic, Mathematical Model, Pattern Recognition

**Awards:** Junheng Lizhi Scholarship (Third Class, 2019), Outstanding Student Leader (2019), Junheng Lizhi Scholarship (Third Class, 2020)

### University of California, Riverside (Riverside, California)

12/2019-06/2020

Courses: Automata and Formal Languages (A+), Intro to Numerical Analysis (A+), Optimization (A+), Intro Mach Learning & Data Mining (A), Decision Analysis & MGMT Science (A-)

### University of Illinois Urbana-Champaign (Champaign, Illinois)

08/2021-Present

Master of Statistics

Core course: Mathematical Statistics, Time Series Analysis, Statistical Data Management, Advanced Data Analysis, Statistical Learning, Machine Learning in Data Science

## PUBLICATION

- Yi Zhao, **Zhen Zhou\***, Qilong Pan, Tianhua Zhou, "G/M/N Queuing Model-Based Research on the Parking Spaces for Primary and Secondary School", Discrete Dynamics in Nature and Society, vol. 2020, Article ID 8870862, 7 pages, 2020. <https://doi.org/10.1155/2020/8870862> (SCI, Corresponding Author)
- Z. Zhou**, X. Zou, Y. Wang\*. A study on the method of determining the number of doctors based on fatigue and numerical fitting[J]. China Health Industry, 2020,17(13):180-183.
- (Preprint) Zou, Xitian, **Zhou, Zhen\***, Wang, Yinghua and Jiang, Liping, How the Second Child and Immigration Policies Affect the Population Structure: An Example from a City in Jiangsu in the Context of Aging. (May 1, 2020). Available at SSRN: <https://ssrn.com/abstract=3614069> or <http://dx.doi.org/10.2139/ssrn.3614069>

## INTERNSHIP

### Intern Data Analyst at Donghai Securities

07/2020-08/2020

- Used TuShare to crawl the historical data of China stocks, got the seven-day time series, divided the data set, and compressed and preprocessed the data
- Based on the three indicators of MACD, KDJ-K, and KDJ-D, tried BP neural network to learn and process the data to forecast the stock market and recommend better stock codes
- Got familiar with and learned the basics of the securities industry

### Technology Department at Zhongjing Technology Corp., Shenzhen

01/2020-09/2020

Supervisor: Bu Youjun

- Participated in insurance technology project related to IoT, I responsible for the Bluetooth module of the electric toothbrush, including connecting the data of the electric toothbrush with the wechat official account. Explored the application of sensors in electric toothbrushes, including temperature, force angle, strength. I attempt to detect and classify teeth based on paddlepaddle
- Explored the relationship between technology and business models and how to meet the demand of different stakeholders, including suppliers, outsourcers, customers and third-parties
- Internship in industrial artificial intelligence. In the projects related to smart grids, put forward my own insights into fault detection and safety assessment based on Computer Vision, searched many related documents, did some processing and analysis of data

### Intern Researcher at Jiangsu Provincial Hospital of Traditional Chinese Medicine (Liyang)

09/2018-09/2019

- Researched the medical record data of Liyang County from 2016 to 2019 and explored how to commercialize digital medical records
- Predicted the future population structure under existing conditions based on Leslie model and predicted the future population structure by using modified Leslie model with two parameters of second child policy and immigration policy added

- Completed the thesis “How the second child and immigration policies affect the population structure: an example from a city in Jiangsu in the context of aging” (Corresponding author)

## ACADEMIC RESEARCH

### Graduation Project at WHUT: Dynamic real-time vehicle detection based on yolo

12/2020-

Advisor: Zan Jinpeng

(In progress)

- Recognition of vehicle targets; I plan to use the UA-DETRAC data set to divide vehicles into four categories: Van, Bus, Car, and Other.
- Segmentation of road markings
- Create a file for a single vehicle target, including four variables: lane, driving direction, speed, and acceleration

### The optimal arrangement of multisensory smart roof at University of California, Riverside

03/2020-05/2020

- In cooperation with Mr. Gao Haoran, studied the best design of a multisensory smart roof combining both PV panels and skylights intelligent skylight in low and medium latitude areas, based on MATLAB and combined with solar energy GHI and EPEP data of NREL mid-latitude area
- Responsible for model establishment, code compilation, thesis writing, and chart optimization, completed the thesis “Optimal arrangement and simulation for multisensory smart roof in northern mid-latitude regions”

### Pattern Recognition at WHUT

09/2019-12/2019

Advisor: Prof. Wan Yuan

- Reproduced the code of various algorithms in pattern recognition
- Independently wrote codes of the face recognition based on K-L transform, handwritten digit recognition based on BP neural network and liver cancer data recognition comparing various algorithms (SVM, perceptron, neural network, and decision tree)

### the Allocation Method of Shuttle Parking Spaces Near the Junior High School Building

06/2019-12/2019

Advisor: Prof. Zhao Yi at Nanjing Forestry University

- Collected the monitoring video data near a primary school and studied its parking space arrangement
- Built a vehicle queuing model based on G/M/N, and applied MATLAB to simulate the queuing model to obtain a reasonable parking space allocation scale drop off
- Proposed an optimization model for parking spaces to assure optimal usage
- Responsible for data collection, model establishment, code implementation and so on, wrote the thesis “Research on the allocation method of parking spaces near primary and secondary schools based on G/M/N queuing model”(Corresponding author and 2nd author)

### Innovative Program at WHUT: Data Mining of Medical Records Based on PCA

01/2019-09/2019

Advisor: Zhu Huaping

- Distributed 200 questionnaires in a hospital in Jiangsu Province and analyzed the feedback; collected, examined its medical record data
- Used AHP to rank the fatigue degree of doctors in different departments, adjusted the workload variables of each department, and then utilized the fitting method to calculate the daily average number of inpatients in the future
- Employed the outcome to solve various problems in human resources, risk management and disease spectrum analysis
- Completed and published the thesis “A study on the method of determining the number of doctors based on fatigue and numerical fitting” as the first author

## LEADERSHIP ACTIVITIES

### Student Associations of Wuhan University of Technology

09/2018-09/2019

- Set up the official account of the university which was subscribed by more than 20 000 users
- Based on the official account and the Mental Health Center of Wuhan University of Technology, established the psychological group of Wuhan University of Technology to help fellow students with mental health problems
- Joined the Mental Health Association of Wuhan University of Technology and held and participated in a series of school programs such as “Psychological situation drama competition” and “Garden party” when serving as head of the communication department

## ADDITIONS

Skills: Skilled in R, C++, Matlab and Python; Competent in thesis writing with Latex

Certifications: CET-4, CET-6, TOEFL (92)
